

Advanced AstroSat Workshop 2023

UV CATALOG OF GOODS-South

Anju, Arvind, Avijit, Geethika, Sipra, Sonika

15th January 2023

OUTLINES

1. INTRODUCTION

2. TOOLS AND TECHNICQUE

- I. Background estimation
- II. Source extraction
- III. Photometry
- IV. Error calculation
- V. Aperture correction
- VI. PSF Modelling

3. ANALYSIS

4. INITIAL RESULTS

INTRODUCTION

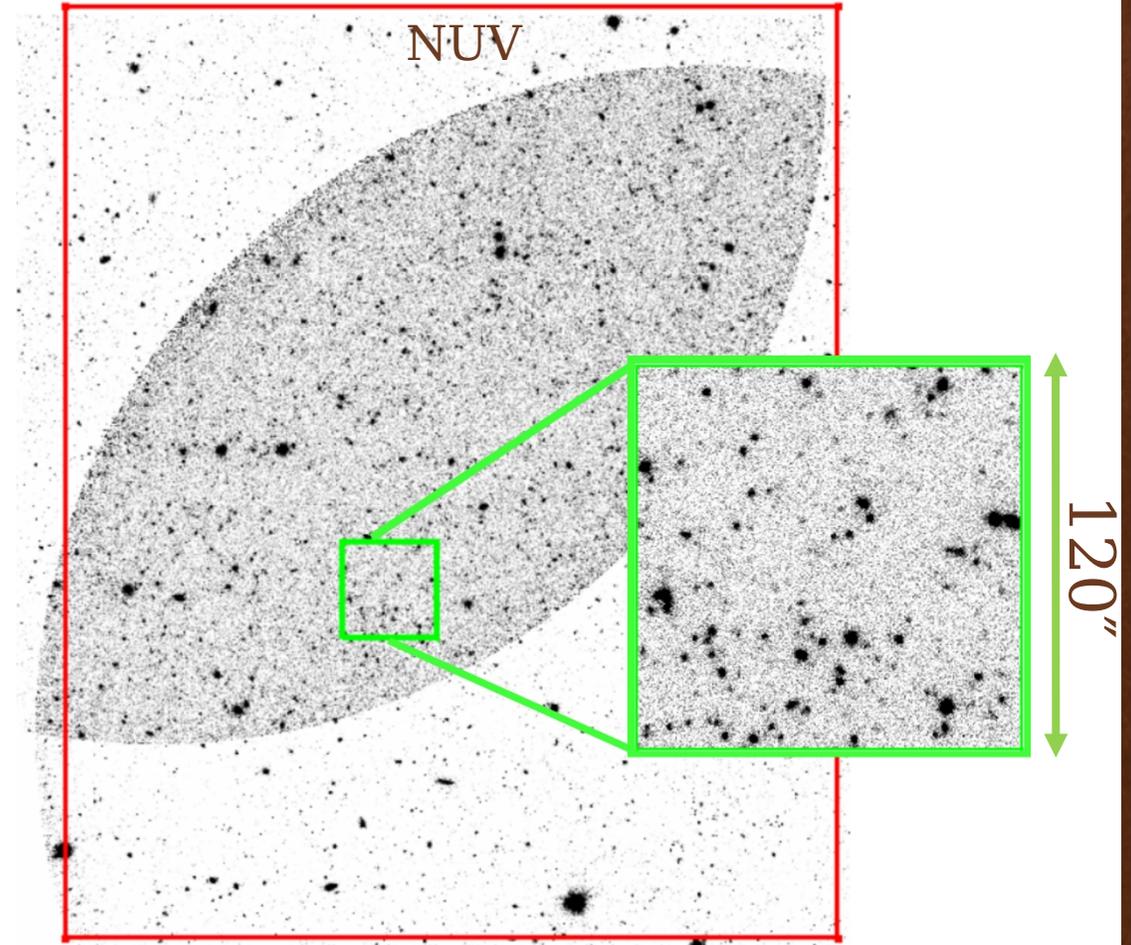

Data: FUV & NUV using
UVIT/AstroSat

Filters: N242W (NUV) & F154W
(FUV)

Exps time: 63 kilo sec

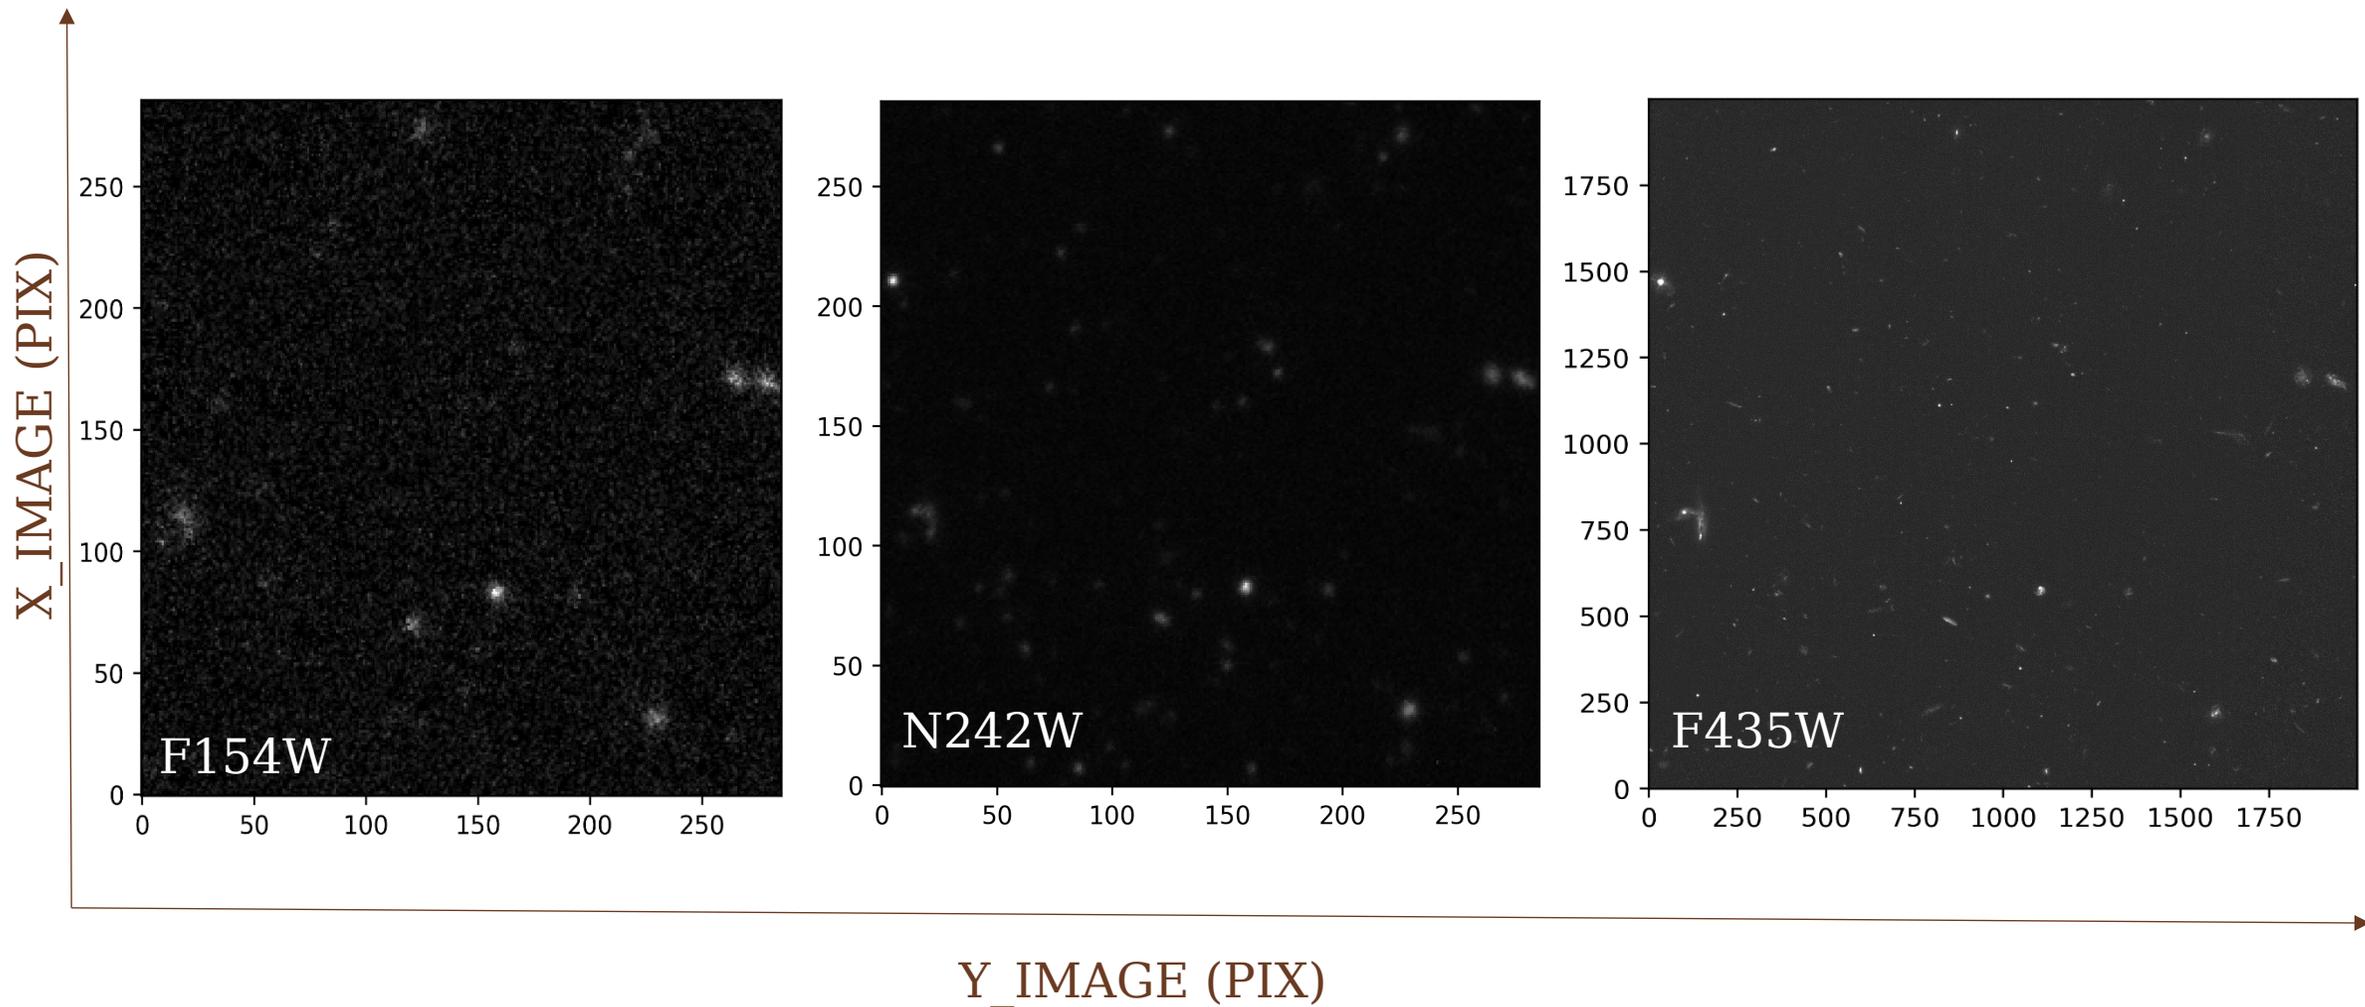

Region: 120" * 120"

*The image shows the NUV observation
with the concerned patch (shown in a
green box) and the red box highlights the
general GOODS-South region covered by
the archival HST observations.*

This product includes results achieved by the IRAF64 project in 2006-2009
directed by Chisato Yamauchi (C-SODA/ISAS/JAXA).

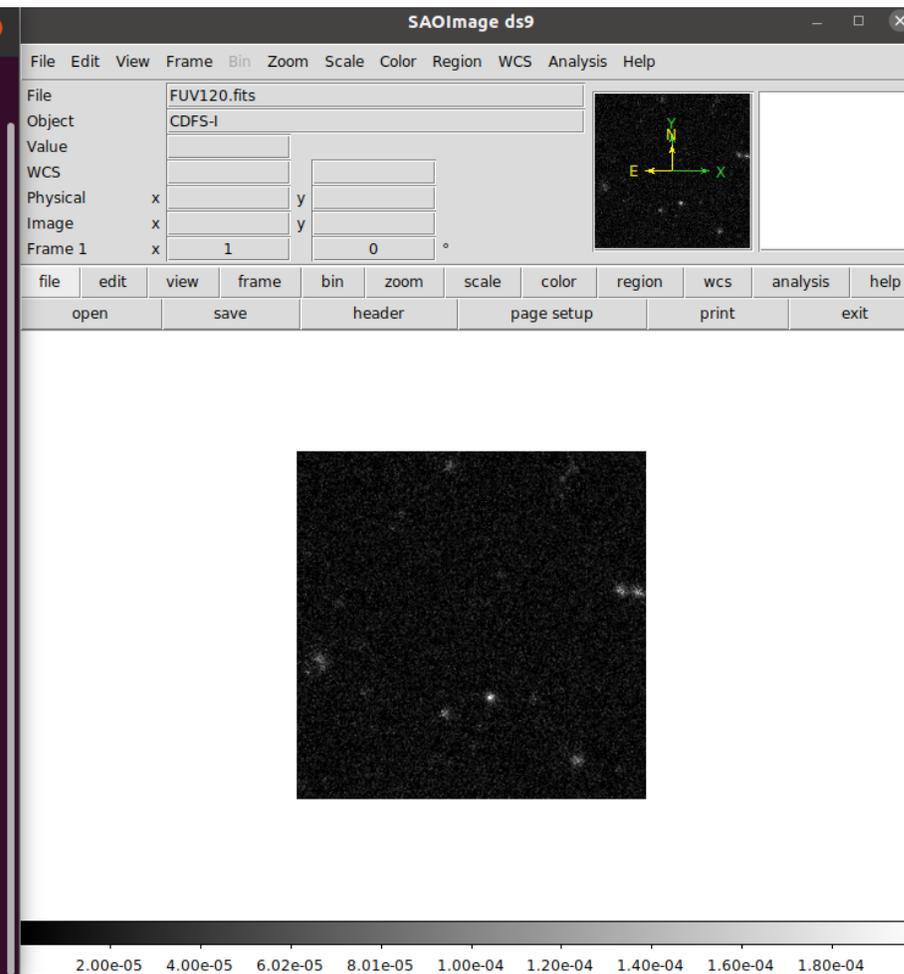

Welcome to IRAF. To list the available commands, type ? or ??. To get
detailed information about a command, type 'help <command>'. To run a
command or load a package, type its name. Type 'bye' to exit a
package, or 'logout' to get out of the CL.

Visit http://github.com/iraf-community/iraf/issues to report problems.

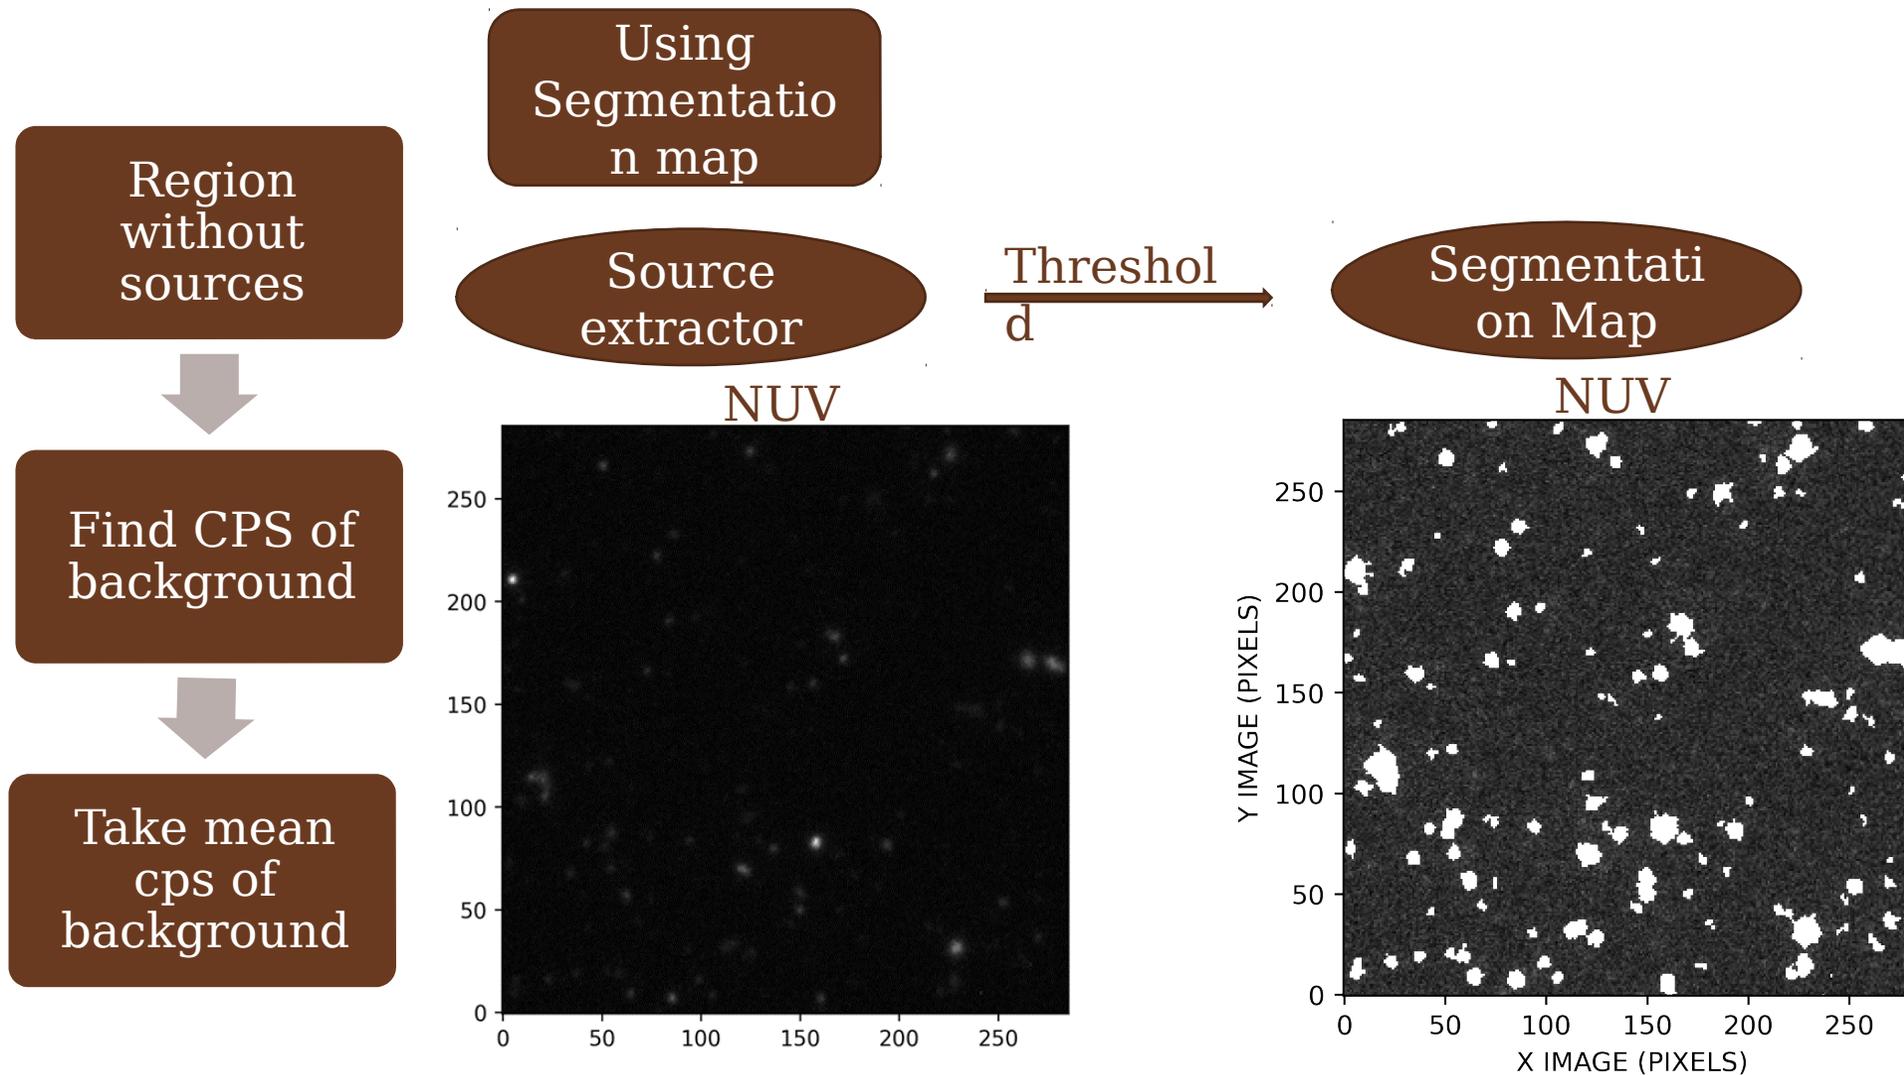

*** Using global login file: /home/srd/.iraf/login.cl
